

3 February 2008

It was in 2000 or 2001 that I first became aware of Foot Mechanics (Foot Clinics) due to an article in the Otumoetai Centre newsletter about a podiatrist, Amy Nicols, who would be working from the Otumoetai Medical Centre using the Clinics facilities.

At that stage I had never been to a podiatrists, but due to joint problems I had had to seek help.

The podiatry treatment was great and a problem I had had for years with shoe wear and pain due to a shorter left leg was assisted by a mould of the foot being carried out and heel insoles being made by Foot Mechanics.

I am still using the insoles, which says a lot for their manufacture. Also assistance with putting on sox's and shoes was given by the podiatrist.

I have continued podiatry treatment with the Company and I would recommend Foot Mechanics (Foot Clinics) as the staff are very competent and will attend to all problems. One just needs to point out any matter of concern and the problem will be fixed on site or referred for further attention at Foot Mechanics premises.

I would recommend this Company to anybody.

M.B. (Beverley) Burns
