

Do you ever wonder “What difference do I really make”?

We do make a difference! At Foot Mechanics, we exist to provide services and products to help our communities flourish and to provide the opportunity for meaningful employment. This difference we make is real and we do help our communities flourish. Flourishing to us looks like helping our patients connect with people, with the earth, and with life. Having our patients be able to do what they love and connect with their favourite people and places is our goal. We know that every day we step into our clinics we are restoring joy.

We have over 20 clinics nationwide in New Zealand. Join the largest team of Podiatrists where you can share case studies and always have someone ready to support you when you need them. You can expect to treat anything from musculoskeletal injuries, and diabetic foot care to nail and skin conditions and perform nail surgeries. While you’re looking after our patients, we look after you with a package that is hard to beat.

Foot Mechanics Support Office is situated in Tauranga and staying connected is vital. A terrific way to stay connected is by regular video calls. We encourage the sharing of ideas and collaboration across the whole team. We also value and love being together while we learn so we host our own annual conference, which we plan to make sure covers most of your CPD in one go.

We have Podiatrists at all levels of their careers and would love to hear from you at whatever stage you are currently at, student or experienced alike. To tick the final boxes, you will need the following :

- Degree in Podiatry
- Current Annual Practicing Certificate
- Valid driver’s license or be eligible to obtain a valid NZ driver’s license
- Must have NZ residency or be eligible to obtain a valid NZ work visa

We have positions available nationwide so apply for a position now by emailing us at jointheteam@footmechanics.com with your Cover Letter and CV to express your interest.
